Mustafa Samet DİNÇ

Full Stack Developer | Software Engineer

I have been working on software since 2022 because of my interest in software. After my individual studies in 2023, I joined the Workintech Full Stack Developer program.

I completed nearly 80 projects and Full Stack Developer processes in 6 months. In my achievements; I think that because I know what you want, I work determinedly, I am open to innovations and new technologies, and my investigative side is effective.

My career goal is to be a part of the company in achieving its corporate goals while continuing my personal development. In this way, I can find opportunities that will add value to my profession as a software developer in line with our common goals.

- Create a shopping cart with React and Redux and see it in your cart

PhotoTalk , *Full Stack Developer* –   Js|HTML|CSS   **GitHub | Website**

- I developed this project using modern technologies such as HTML, JavaScript, Node.js, Git, MongoDB and Cloudinary.

- The project offers a comprehensive platform where users can interact. Its main features are:

- Secure Login and Authentication,

- Photo Uploading and Editing,

- Social Functionality: Users can interact socially with the ability to follow each other. In this way, bonds are created between platform users and content sharing is encouraged.

- Contact: Users can reach the site owner from the "Contact" section.

- Cookie Management: By using cookie parser, it is possible to manage users' sessions and send secure cookies to web browsers. In this way, the user experience is further improved.

ChatHub, *Full Stack Developer* - React | Socket İO|Node js   **GitHub | Website**

- ChatHub is an interactive chat application that offers real-time communication and allows users to communicate instantly within the same room.
- Socket.io: Used for real-time communication and allows users to send fast and instant messages.
- React: React was used to create the user interface. This ensures that users have a user-friendly experience.
- Node.js and Express: Used to manage the server side and process data.
- Tailwind CSS: Used to provide a stylish and user-friendly design.
- ChatHub has a simple and user-friendly interface where users can easily create new rooms or join existing rooms. This allows users to communicate instantly by creating groups on topics of their choice or joining existing chat rooms
